

1. Introduction: The Leica Automatic Knife Sharpener is specifically designed to quickly and accurately hone microtome knives to a precise and fine cutting edge. Additionally, provision has been made to eliminate the tedious task of manually redressing the honing plates. In total, the new sharpener will provide you with greatly increased efficiency in honing, convenience in redressing plates, and a considerable amount of valuable time saved. Color coded controls insure that the level of the honing plate is in accordance with the operation: coarse honing and redressing, blue; fine honing, red. Please read the manual carefully before operating the instrument. Particular attention should be paid to the section on safety precautions.

2. Technical Specification:

- **Power supply:** Model 940 is 230V/50Hz
- **Overa**
- **Il Dimensions:** Width 370 mm; Heigh 460 mm; Depth 540mm
